

JCC Intervention on the Seminar “Disproving the anti-communist lies spread by the institutions of the capitalist system.”

Dear Comrades,

First, thank you to the Communist youth, Turkey for organizing this MECYO and thank you all to come to share your struggles fighting anti-Marxism-Leninism.

On the national reality of Catalunya, anti-communism is present in numerous ways. We can identify mainly two focus of anti-communism, Neoliberal right and socialdemocratic/postmodern left, which express their anti-communism in different ways. The ways we fight each expression is more or less the same but the expressions are different so we will proceed to explain in a general way how each one is expressed, giving some examples.

Neoliberal right expresses their anti-communism in a clearer way. They say openly that they think that communism, socialism or even social policies are bad. Giving that they own both the parliament and the mass media our strategy is simply to unveil their lies using all the weapons we have at our disposal. We have identified both the Catalan nationalist and Spanish nationalist right as main enemies at this stage of capitalist development, so we concentrate most of our efforts to fight their anti-communism. For example, given that they control the education program of both lower and higher education we developed a system of courses and a collection of entry-level of Marxism-Leninism books in collaboration with our reference student union AEP to combat the anti-soviet and the anti-republican Spain they spread. The aim is simply to fight historical revisionism and to normalize Marxism-Leninism inside the Catalan youth. Neoliberal right often equals communism to fascism under the label of totalitarianism. We find that is very important to fight fascism with ferocity so can society can see and feel that such label does not exist. It's important not only to assert the differences in acts, texts or more traditional ways but also in the social networks or generally in the internet.

On the other hand, we can see some anti-communist behaviors on the generally called reformist left. Their message is not so direct and is aimed generally to see Marxism-Leninism as a thing of the past. We find that this is a dangerous message but we must make a difference as Catalan reformist left usually denounces fascism and all their representations. One example of this kind of behavior is, recently, we have heard some parties saying that the true Russian revolution was the bourgeois February revolution. Others says that working class is dead. We think with this examples you can see why this message is also dangerous. Yet, the strategy remains more or less the same, fight with every weapon available. Is in our hands to unveil the lies spread by the capitalist institutions.

Thank you all.
